• •	Light machine gan: Model 15, 6 fed, each magazine holding 2006 also manufactured by Ceska Zerole at 3
(c)	Heavy machine gun: Model 37, call. fed, each belt holding 200 rounds. Also the cape of its Ceska Zbrojovka. this is the best weaper of its type in the world; the German SS Elite troops used it as their standard heavy machine gun.
(4)	Sub machine gun: The Czech sub machine gun is a postwardeveloped weapon manufactured by Ceska Zbrojovka in 1948 and 1949, at Brno, Usetin and Povazska Bystries where plants of Caska Zbrojovka are located. It is manufactured in three models all of which are 9mm caliber and magazine fed. Magazines are of two capacities, 24 and 40 rounds. The magazine is straight and not curved like the Soviet. The three models are:
	(1) Model 48 A is a one piece gun with a wooden stock;
	(2) Model 48 B is all metal with a hinged metal stock which folds over the top of the gun similar to the Soviet model PPS M1943;
	(3) Model 48 C is all metal with a metal stock which was specifically designed for paratroops and can easily be broken down into three parts thus making it portable within the clothing of a paratrooper.
(e)	Panzerfaust: The Czech Army has adopted the German Panzerfaust of World War II. the Czechs have
	modified the derman model and have increased its effective range to 300 meters and that it is being manufactured by the Czechs.
(f)	use in the Czech army; the German yand protot, and Soviet pistol TT M1933 Tokarev.
(g)	Mortars: There are two types of mortars which are in use in the Czech Army: the German 80mm mortar, and the Soviet 82mm mortar 1943 model.
	The ammunition used in both mortars during training was the 80mm ammunition abandoned by the Germans when they left Czechoslovakia.
3. The	following anti-tank weapons were used by the Czech Army:
(a)	Panzerfaust: The German model
(b)	45 mm AT gun: This is the Soviet model Mi942 and is the main AT gun in use by the Czech Army.
